ALPHA GALACTOSIDASE (*Aspergillus niger*)

SPECIFICATION SHEET

I.U.B. 3.2.1.22

DESCRIPTION

Is a highly active α-D-galactoside galactohydrolase preparation derived from a selected Non-GM strain of *Aspergillus niger*.

PHYSICAL PROPERTIES

An off white to cream colored, fine, free-flowing powder, soluble in water, free of offensive odor.

ENZYMATIC PROPERTIES

The pH optimum is 5.0 with a stability range of 4.0 to 8.0. The optimum temperature is 60°C with a stability range from 40°C to 65°C. The enzyme can be inactivated by raising the temperature to 70°C and holding for 15 minutes.

ACTIVITY

Is measured in GALU units per gram as determined using a modified GALU method at a temperature of 30°C and a pH of 5.7. The acceptance criteria for all enzyme assays is: NLT 85.0% and NMT 115.0% of declared units of enzyme activity.*

COUNTRY OF ORIGIN USA

STORAGE/SHELF LIFE/STANDARD PACK SIZE

Product is stable for two years (24 months) if stored at or below 10°C in sealed poly bags in box away from sunlight and high humidity. Product is packed in 25 kilo fiber drums or double-wall boxes.

HANDLING PRECAUTIONS

Avoid the formation of aerosol and dust of the product. Repeated inhalation of enzyme aerosol can cause allergic type reactions in sensitized individuals. For detailed information please refer to the SDS.
