CERTIFICATE OF ABSENCE OF GMO & GAMMA IRRADIATION

Catalase (*Aspergillus niger*)

To Whom it May Concern:

The material contains Catalase from fermentation, standardized with maltodextrin from corn. ERC Catalysts, Inc. only sources Catalase produced from Non-GMO fermentation.

The maltodextrin used may be from a GMO corn source; however, during the production of maltodextrin, the corn DNA is denatured, degraded, or removed. Therefore, corn DNA should not be present in measurable amounts in the maltodextrin used, or in the final Catalase product.

We further declare that the product is not treated with ionizing radiation (gamma rays) or with ethylene oxide (ETO).
